I have a uint8_t array containing values of up to 255. How can I check if one specific integer fits into it? For example, if the array contains the following: 1 // 100001 128 // 100000 232 // 100010 256 // 100011 Can I check if my input value is between 128 and 231? A: Just cast both to int. If they fit, it's OK, you don't need to do anything more.
