Q: Html form in asp.net I have a problem with the content I am getting in my form. I have a table in my asp.net. I made a function (fetch form(sql) to fill this form(table)).

```
if (fetchData()){ return  
html.tbl_User_Insurance(sql, result, div); } else  
{ return "Message"; } tbl_User_Insurance is  
made in the same page and looks like this:  
CREATE PROCEDURE  
[dbo].[tbl_User_Insurance] @id int, @sector  
varchar(50), @age int, @mobile varchar(20),  
@address varchar(20), @name varchar(20),  
@birthday varchar(20), @sex varchar(20),  
@doc date, @paID int AS SELECT u.id,  
u.sector, u.age, u.mobile, u.address, u.name,  
u.birthday, u.sex, u.doc, u.paID FROM  
dbo.User u WHERE u.id=@id ORDER BY u.id
```

**What's new:**

- **Career - Play as both a manager and a player in Career Mode.**
- **Gameplay - The vastly improved PES 2016 engine powers the gameplay on Xbox One and PS4. Players feel lighter, more in control, and feel faster, stronger and more creative thanks to the new physics-driven tackling, lower mass, and ball control. Fans can also create custom tackles and runs to further enhance gameplay.**
- **Player Ratings - Thanks to Player Ratings developed based on multiple independent sources, players show more realistic, objective and detailed attributes providing more insight on a player's abilities.**
- **Attacking - Player's passing is more versatile than ever with new powerful and precise passing tech, consisting of 'passing algorithms' and the ability to change the type of pass as the player gets closer to the receiver. Players are more refined with improved passing controls and increased timing in real-world situations with more realistic ball physics.**
- **Defensive Play - Play is completely reactive. Players**

- 
- automatically understand the space to fill, closing down space and moving out to intercept or make the tackle. Finally, a player is fully aware of the teammate and can play a perfect pass or even score a goal.
- **Tackling** - New and improved tackling mechanics put players in more realistic scenarios using A.I., new tackle animations and reactions and more.
  - **Fouling** - Four new foul types give players complete control of the contact, while defensive-minded managers can take advantage of penalty system through improved fouling awareness.
  - **Creation and Interaction** - Players show a more authentic presence in the environment as they are more aware of their surroundings. While scouting, players will be able to gauge their options, say hi to teammates, or talk with a ref before posing an official question.
  - **Team Play** - Players and managers have a much more active role in the team concept. Pools dictate player selection, the collective intelligence of the team, as well as define their strategy. Managers can also call for sub-stitutions based on the tactical approach, sacrificing players with skills and attributes that are less relevant, but that can improve overall team performance.
  - **Player Motion** - All players are skillful in all dimensions, avoiding defenders or picking up pace for the next move. Players show more agility
